

Tata Institute of Social Sciences, Mumbai

Vacancy Announcement:

Name of Position: Data Analyst

Number of Vacancies: 3 (Three)

Remuneration per month: Rs 35000/-

Project: National Research Study on Human Trafficking in India (NRHTI)

Duration: Till 30 April 2019

About NRHTI:

Human trafficking is one of the gravest forms of deprivation of human rights and dignity of human beings. Though slavery has been abolished many decades ago, it has taken a new shape and that has been reflected through the crime of human trafficking. The victims in this trade are the modern day slaves who have to face brutal torture, confinement, sexual abuse, repeated rape, bonded labour, exploitative work conditions, non-payment of fair wages, sell their body organs, rent their wombs, etc. The extent of this hidden crime of human trafficking is that it has become a thirty two billion dollar profit making industry and ranked at third place in the organized crime industry after hidden drugs and ammunition trade. Though several International conventions and legal interventions have been introduced and implemented, the crime of human trade continues to flourish. The Constitution of India, vide Article 23 has mandated that trafficking in every form is prohibited. Therefore, every person in India has a fundamental right not to be trafficked and accordingly it is business of everybody to ensure that no person is trafficked.

The National Research Study on Human Trafficking in India (NRHTI) is a national level research programme being initiated by Tata Institute of Social Sciences under the aegis of National Human Rights Commission of India. It is a multi-partner project where several United Nations agencies and other organizations have also joined hands to work collaboratively. The objectives of this national level research project is to estimate the nature and extent of human trafficking in the country, assess the economics/ finances of human trafficking in India, understand the changing dimensions of human trafficking, identify social, economic, political, cultural causes at the household, community and regional level, trace the processes involved in human trafficking and understand the levels of exploitation, to examine the current response systems and to suggest and recommend the way forward to address the gaps identified through the research. The project is in the data analysis and report writing stage. In view of this, TISS aims to hire Data Analysts to carry out the following responsibilities and tasks:

A. Responsibilities:

The Data Analyst will be responsible to lead the analysis and report writing work for the assigned states and will work with the National Research Team.

B. Tasks:

- Work with large data sets to extract insights
- Data cleaning before analyzing the datasets
- Consolidate data sets to improve reporting and analysis
- Prepare tables, power point presentations
- Data analysis and report writing

C. Required Qualifications, Competencies and Experiences

Advanced level of experience with statistical analysis tools (**Stata/SPSS**) and ability to comb through large amount of structured and unstructured data

Experience in data preparation and analysis

Strong problem solving / analytical and research skills

Ability to quickly recognize patterns, gather data, draw logical conclusions and successfully present findings/recommendations to colleagues

Ability to work in a fast paced, team environment

Walk-in Interview:

Date: 15 October 2018

Time: 2.30 pm onwards

Venue: Dr Sharon Menezes, Faculty Room no 5, School of Social Work, TISS, Old campus

*Please carry your CV and a sample of your published or unpublished work.
